Office Action Summary	Application No. 10/523,162	Applicant(s) SMARSH ET AL.	
	Examiner Timothy M. Speer	Art Unit 1794	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. On further consideration, the restriction requirement is withdrawn. Accordingly, claims 1-15 will be treated on the merits.

Information Disclosure Statement

2. The information disclosure statements filed 07/10/07 and 01/27/05 have been considered and made of record.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. This claim contains improper Markush language, rendering the claim indefinite. The members of a Markush group must be closed and the phrase "including steel, nitrides, . . . " appears to indicate that the group is open.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

7. Claims 1-5, and 7-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Cheever (USPN 5,718,516).

8. Cheever teaches spindle motors comprising a spindle, where the spindle is formed from a ceramic coated metal. The ceramic may, for instance, be coated with TiN, as recited in the present claims (col. 4, lines 15-22). Regarding the presently claimed flexural properties, since the materials of Cheever are the same as those of the present invention, it is the Examiner's position that the prior art will inherently exhibit the claimed properties.

9. Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Schultze (USPN 5,043,182).

10. Schultze teaches metal infiltrated metal oxide components (abstract). The components may comprise, for instance, aluminum infiltrated alumina and may include additional metallic components (Example 1, for instance). Regarding the presently claimed flexural properties, since the materials of Cheever are the same as those of the present invention, it is the Examiner's position that the prior art will inherently exhibit the claimed properties. The preamble of the

present claims is not being given significant patentable weight, since the portion of the claim following the preamble does not rely on the preamble for completeness. Accordingly, it is the Examiner's position that the present claims are anticipated by the applied prior art.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy M. Speer whose telephone number is 571-272-8385. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Keith D. Hendricks can be reached on 571-272-1401. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
